mFine – The Better than Fine Growth Strategy

We recommend a two-pronged approach as shown here, where we focus on both value maximization of the existing network and expanding the network to newer avenues in the business.

We conducted consumer surveys, stakeholder interviews (moving beyond the traditional patient-prescriber to even caregivers and providers) and deployed empathy map design thinking to evaluate the pain-points for each persona.

Our Sources of Insights

2 Field visits **22** Phone calls
15 stakeholders **36** respondents

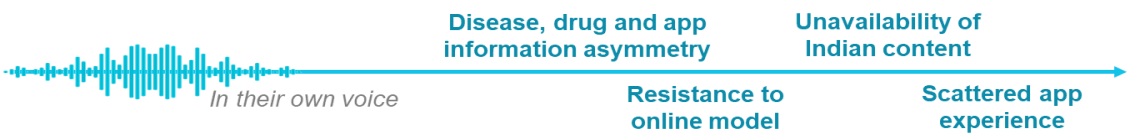

We have spoken to doctors, patients, key competitors (managers), referred research papers & consulting reports, hospital websites and healthcare experts and professionals

Across the patient journey (left -> right), we understand that a strong undercurrent of emotion has to be addressed apart from the clinical pain points as the gaps. We visually summarize our findings about each persona's touchpoints, decisions and emotional state through out their discovery to the final medical engagement.

Customer Personas	DISCOVERY/ AWARENESS	EXPLORATION	EVALUATION	ENGAGEMENT
	Symptoms/ Need to remain healthy	Resources that meet the need states	Decide between alternatives	Avail the selected service
Mother India	Increase child's immunity and prevent medical conditions	Identifying childcare & vaccination centers	Ask other moms / Consult specialists	Comprehensive Care
	"I want the best care for my child and more time with the doctor for my one!"			
Grand Dada Ji	Managing chronic conditions through regular care	Specialty Hospital	Offline Availability	Long-term
	"I don't want to be a burden on the family"			
Penny-pincher Professional	Addressing acute conditions	Clinics / General Physicians	Google Reviews/ Proximity	Short-term / Low frequency
	"Neither can I afford to be sick nor can I afford healthcare without insurance"			
Fitness Freak	Maintaining fitness and diet	Digital Solutions	Health apps / Price sensitivity	Cross-sell different products
	"I want to be fit and track it every day, just like 92% of my peers"			

The consistent pain-point categories found to be common across personas have been highlighted below

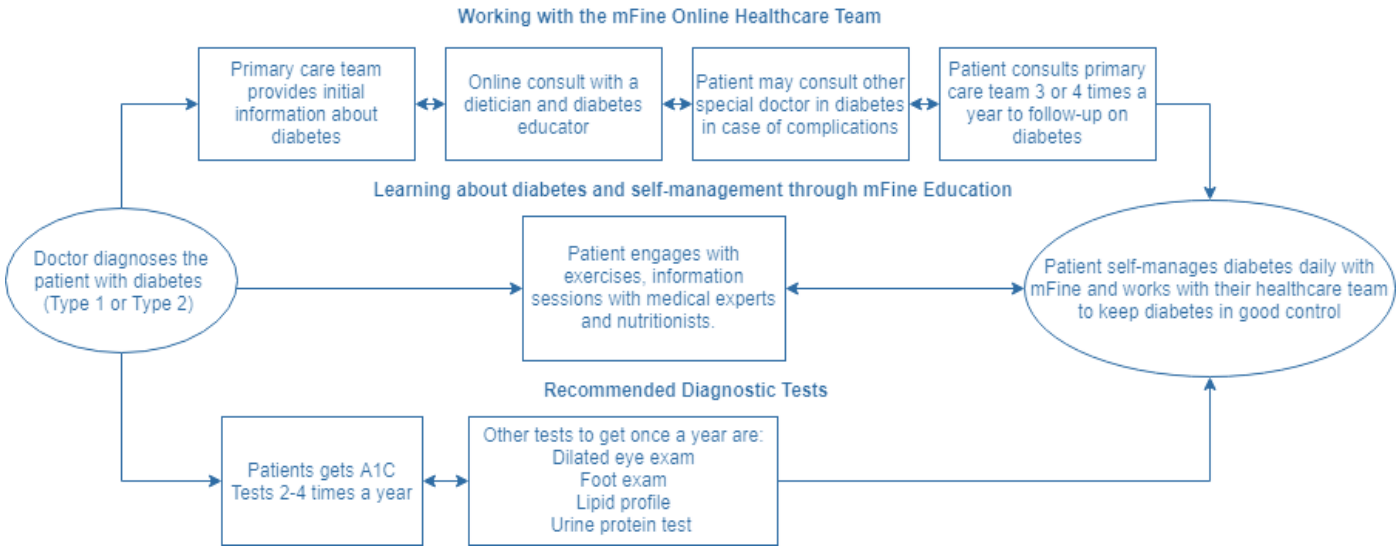

Basis the understanding of our consumer segment and key observations from the analysis of the existing portfolio of mFine's offerings, we synthesize our offerings in this table with 5 product solutions and 2 other innovative ones.

	Inspiration	Ideation	Implementation
1	*"I want to be sure the doctor is approachable and real"**	*Expand to potential territories with digital healthcare footprint*	**Mumbai, Pune and Chennai** are the next target geographies with the highest potential for the growth
2	*"I manage diabetes, I don't want to manage multiple apps or packages too"*	*One stop solution to all chronic disease management*	Offering is a combination of information sharing, medicines, drug reminders and appointment monitoring for adherence, health + diet plans and caregiver suggestion **in one plan**
3	*"Pregnancy tracking should be a part of my health routine"*	*Encompassing the complete journey of a mother providing innovative solutions*	**Pre and post pregnancy** are big market opportunities where nutrition, yoga, mental health and pre-contractual cycles information are sought
4	*"I want to have complete control over my health digitally"*	*Health monitor to track all my activities and provides preventive care*	**Preventive healthcare** tips, mental health and potential partnership with **wearable platforms**
5	*"I want a cost-effective solution which doesn't burn my pockets"*	*Rewarding the user for high engagement with app*	**Health card** that fits complete care for the family & also enables insurance rewards for better health management
6	**Information Asymmetry**	***Integrate AR/VR** education sessions to inform patients of diseases and drugs*	
7	**Mobility woes**	***For offline bookings** extension, integrate with **Ola/Uber ride** sharing for quick mobility*	

Implementation details of the key recommendations for target markets, diabetes and neonatal care explained:

1. Diabetes app intervention workflow

2. Pregnancy and neonatal care

mFine assists complete support with choosing health care provider mFine Guide on maintaining health: body, emotions, spirit and mind	Information on services in the community, such as prenatal classes mFine informs mother if both child and she are healthy (growth of baby, movements)	Knowledge on signs of preterm (premature) labour and when to call for help through mFine Plan for baby being 1-2 weeks past due date	Follow-up care needs for baby and mother Vaccination needs for first 3 months post delivery met by mFine

The diabetes market has been chosen for its potential of 7Cr patient base while neonatal and pregnancy have been nearly 47% (21/45) of the listed hospitals have dedicated specialty in this domain. We recommend mFine should use this to its advantage tapping in ~22k customers over 6 months

Regular medication support and diagnostic test checklist at convenience of home

At the given growth rate of 40% MoM, the compounded growth becomes 3.2L users (from base of 60k). Assuming growth saturation, we expect the natural growth to go on till 3L. Our recommendations will add an additional 3.5L (calculations below) and thus, ~6.5L active users will be added to mFine platform

Expand hospital network for OPD			
Metric	**Mumbai**	**Pune**	**Chennai**
Hospital coverage over 3 months	6	6	4
Hospital coverage over 6 months	12	12	8
Expected New Users (5% conversion)	12,000	11,000	17,000
Overall User Growth		40,000	

Be a Complete Pediatric Care Provider	
Metric	**(in Mn)**
New baby borns in India (6 month period)	9
New baby borns in BLR, HYD, DEL	0.45
Expected New Users (5% conversion)	0.02
Overall User Growth	22,500

Preventive Care and Monitoring	
Metric	**(in Mn)**
Young age population (18-35 years)	400
Young age population in BLR, HYD, DEL	10
Expected New Users (1% conversion)	0.10
Overall User Growth	100,000

Health Card for the Family	
Metric	**(in Mn)**
Families in India	300
Families in BLR, HYD, DEL	7.50
Expected New Users (1% conversion)	0.08
Overall User Growth	75,000

Provide Complete Chronic Care Management	
Metric	**(in Mn)**
Diabetic Patients in India (overall)	70
Diabetic Patients in BLR, HYD, DEL	4
Expected New Users (1% conversion)	0.04
Overall User Growth from Diabetic Patients	35,000
Diabetic patients as a percent of total chronic care patients	30%
Overall User Growth from chronic illness	116,667

Our survey indicates a strong need for marketing and SEO focusing on app awareness and trust-building. Key insights:

- **Of the survey respondents using any health app/ website, ~80% haven't heard of mFine app.**
- **Primary use-cases for health app/ website include Doctor appointments and booking diagnostic tests**
- **~90% Users say they find trust issues in using online platforms and prefer meeting doctor face-to-face**

APPENDIX

Calculations for estimating current user base

	# hospitals	# consultations per day	Online consultations through mfine	Total # consultations	Per month
Total hospitals onboarded across three cities	45				
Multispecialty/ large hospitals	10	1,200	60	600	18,000
Mid-size hospitals	35	600	30	1,050	31,500
80% is through online consultations					49,500
20% is through subscription packages					12,375
Monthly transacting users					**61,875**

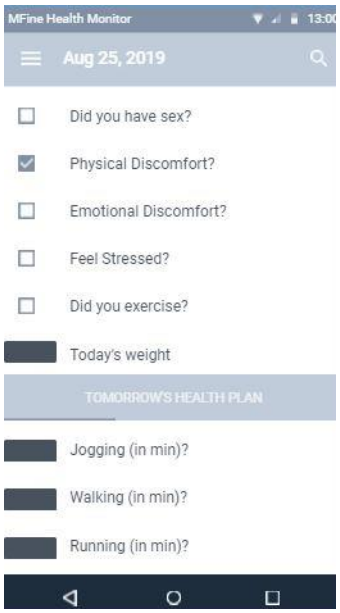

Calculations for expected users from new cities (over launch in 3 months)

City	Hospital	Category	No. of beds	Average daily patients	Monthly traffic	Targeted user share	Expected new users
Mumbai	Fortis Hospital, Mulund	Large	300	1,200	36,000	1,800	6,000
	Platinum Hospital, Vashi	Mid-size	100	500	15,000	750	
	Vasan Eye Care	Mid-size	70	450	13,500	675	
	Surana Sethia Hospital	Mid-size	70	450	13,500	675	
	Global Hospitals	Large	200	900	27,000	1,350	
	Childrens Hospital	Mid-size	100	500	15,000	750	
Chennai	Prashanth Superspeciality Hospital	Large	320	1,300	39,000	1,170	8,523
	Prashanth Childrens Hospital	Mid-size	75	470	14,100	423	
	Gleneagles Global Heatlh City	Very Large	1,000	4,000	120,000	3,600	
	MIOT International Hospital	Very Large	1,000	3,700	111,000	3,330	
Pune	Saishree Hospital	Small	40	300	9,000	270	5,472
	Deccan Multispeciality Hardikar Hospital	Mid-size	120	480	14,400	432	
	Lifepoint Multispeciality Hospital	Mid-size	100	400	12,000	360	
	Ruby Hall Clinic	Very Large	750	3,000	90,000	2,700	
	Jehangir Hospital	Large	350	1,400	42,000	1,260	
	Columbia Asia Hospital	Mid-size	100	500	15,000	450	

Assumptions:

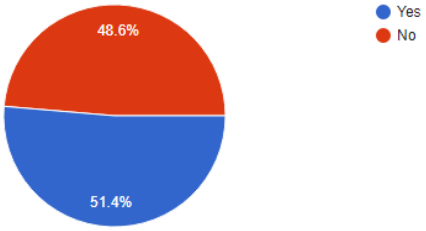

1. We are assuming a lead time of 6-12 weeks to onboard any hospital, based on the Mfine webex.
2. The hospitals selected have a history of working with digital platforms, which should make onboarding easier as compared to a completely new player.
3. The daily patient data is a function of bed size and a triangulated extrapolation from website data, government benchmark data and consulting report data.
4. Targeted User Share is 5% of monthly traffic, which is a generous estimate given the same rate for Practo is around 2-3%. The differentiating factor will be the marketing campaign based on our customer segmentation.
